1. Brand Overview

Mission

ColonAssist's mission is to create an environment in which colon cancer is non-existent. Colon assist wants to make patients comfortable discussing and treating colon cancer throughout all stages of the condition.

Messaging

ColonAssist's messaging is intended to be comforting and friendly in order to make the patient feel safe. Creating fear within the brand's messaging is to be avoided at all costs.

Stage Distribution

From 2018 to 2022, about 1 in 3 colorectal cancer cases were diagnosed at a localized stage, meaning the cancer had not spread outside the colon or rectum. Almost 4 in 10 colorectal cancers were found at a regional stage (the cancer had spread to nearby lymph nodes, tissues, or organs), and about 2 in 10 were found at a distant stage (the cancer had spread to distant parts of the body).
